Challenges in Successful ERP Implementation ??

How RAMA's Service Delivery Overcome the Challenges??

Inadequate understanding of business processes controls, needs & objectives

Vast exposure in business consulting provides an **un-parallel edge** in defining business process controls & clearly defining the objectives

Non-alignment with business stakeholders in the implementation process

Interactive discussion with operations team & **due consideration** to practical business scenarios

Lack of competency to correctly spell the business requirements & critical business scenarios

Well drafted design document with the help of existing understanding & discussions with project stakeholders

Availability of resources to invest required efforts while designing the requirements & accepting the delivery

Business consultants as a part of the team forms a bridge between the users & implementation team
