

# IS YOUR MICROSOFT DYNAMICS E-INVOICE READY??

## Microsoft Dynamics Roadmap for E-Invoicing

### E-Invoicing Ready MS Dynamics - Changes to be made in MS Dynamics

#### MS Dynamics landscape for E-Invoicing

## Challenges

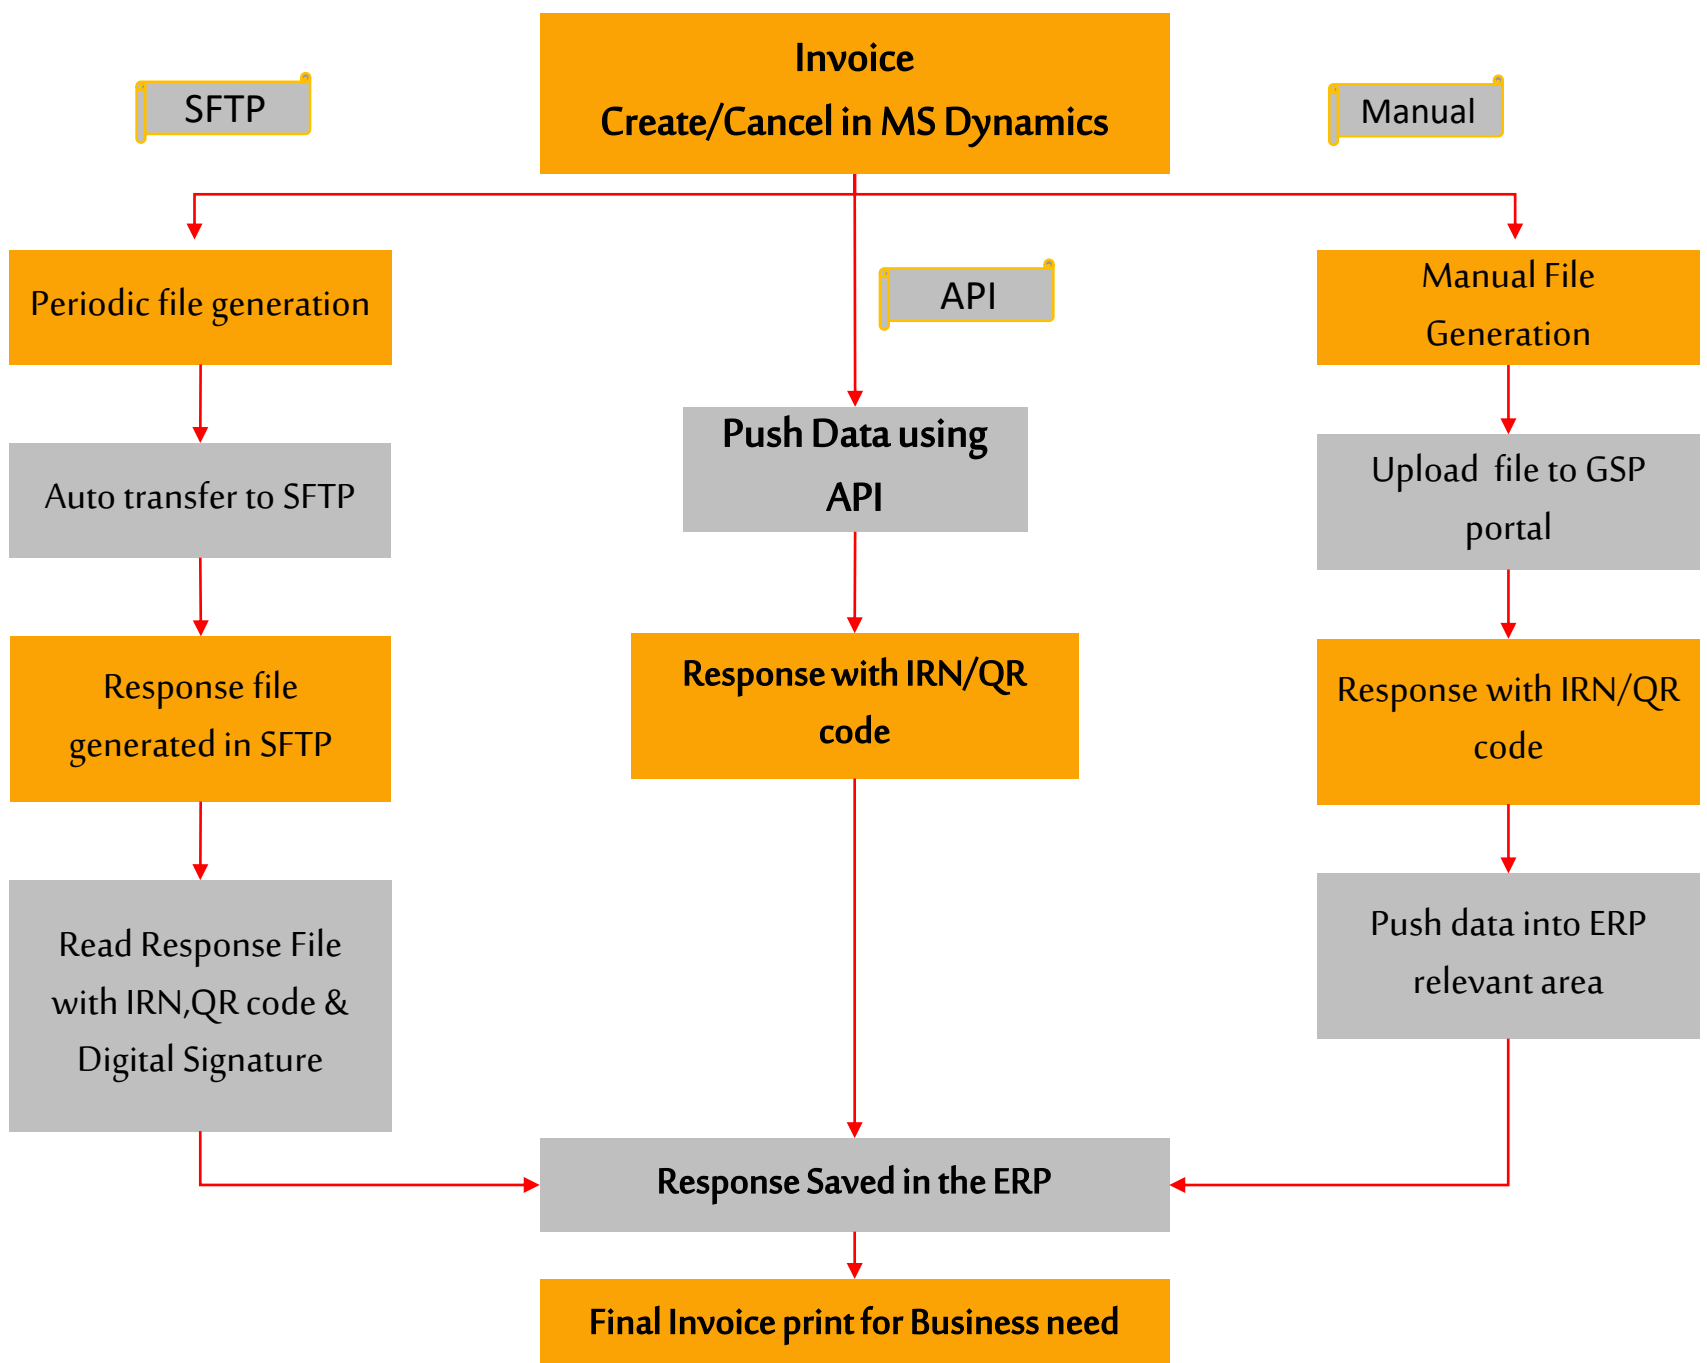

### Technology challenges:

- The existing ERP system must be re-configured for seamless sync with the IRP. It will have onetime cost, most as well recurring cost.
- A large group having different business verticals within the group, may have varying demands for invoice generation, which would require additional customization of commonly maintained ERP systems

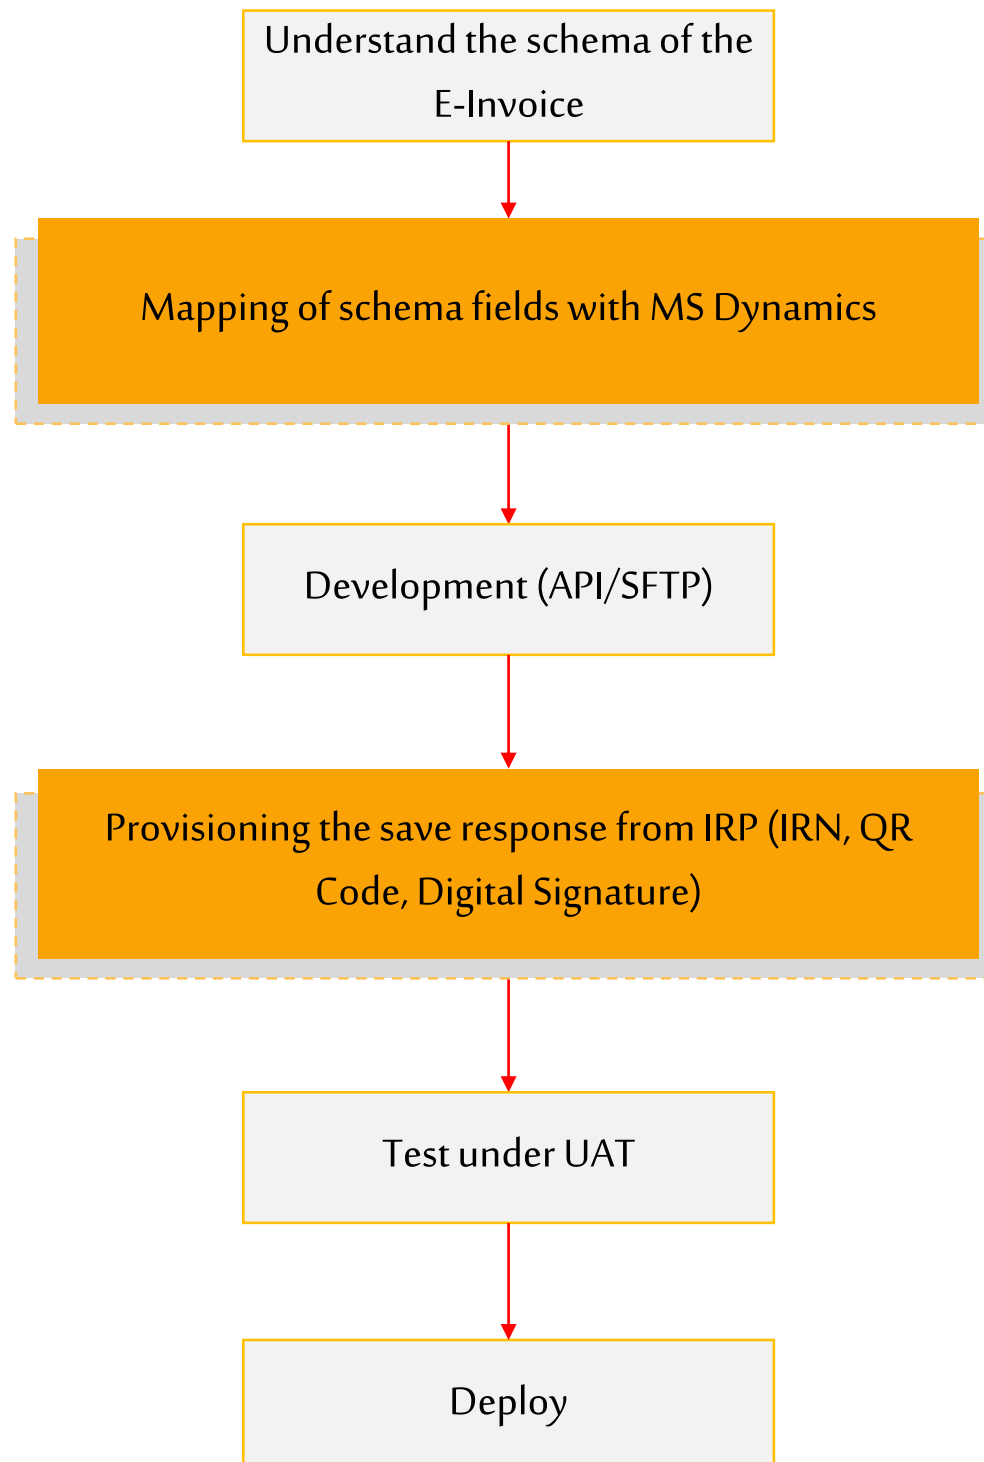

### Operational Challenges:

- The schema issued for E-invoice is having many optional fields. Businesses will also have to look at the requirements for skill development and further upgradation for Staff concerned with invoice generation and accounts.
- Additional technological upgradation can also be undertaken to automate processes such as payment, reconciliation with PO raised by buyer as well as bank statement to fully realize the benefits of the transition.

## Options to convert a Sales Invoice to Business Ready Invoice with IRN, QR, Digital Signature

## Implementation Approach for incorporating API/SFTP based E-Invoice
